

## Classwork: Bootstrap 3

Friday, November 14, 2025 11:54 PM

### Submission:

- Push to "bootstrap\_assignment" repository.
- Save html file as "bootstrap\_assignment\_3.html"

### Instructions:

- Modify the HTML given in "Classwork: CSSS Exercise", to create the responsive page with only Bootstrap class (no raw CSS).
- The HTML structure can be freely modified as you see fit.
- When the screen is wide (lg break point) let the two content horizontally align as shown below:

### Athiphat Hirunadisuan

#### About Me

A former employee of the Assumption University working as a system engineer for 27 years, challenging himself in the private sector.

#### Achievements

- The first one who implement containerization technic for university infrastructure management
- Configuring the local Git system from Gitlab opensource.
- Lead developer for Prompt Post application for THP (Thailand Post)
- CTO of Game Square Interactive, one for the first Game Studios established in Thailand

### Hint:

- bg-primary
- text-white
- justify-content-center
- align-items-center
- Choosing appropriate column width
- Adjusting break point properly
